

Digital Automatic Tire Inflator

K3060 and K3063

Crafted from durable aluminum with a digital display, this inflator is built to last and withstand heavy-duty use. Its digital features make it easy to set and monitor the desired tire pressure, providing convenience and precision for any automotive maintenance needs.

Features:

- Ceramic sensor for highly accurate, which inflates accurately with a hose up to 50m long. Oil and water resistance, high accuracy, long service life.
- High-definition digital display, large easy to read LCD with backlight
- Standard inflate/deflate (example: Connect the tire to start inflating and deflating automatically and stop automatically when the pressure is reached)
- Comprehensive diagnostic and error reporting with audible warning
- Unit selection: PSI, BAR, KPA, kg/cm3 for units can be selected convenient for customers in different countries to use
- Over Pressure Setting Function for tire shops, where new tires are fitting, and you need to ensure that the tire inflates to a pressure where the tire seats correctly on the rim and then deflates automatically to the required pre-set pressure
- Robust aluminum diecast housed digital auto inflator is simple to use

K3060

Three presets inflates and deflates pressure setting

K3063

One preset inflates and deflates pressure setting
